WORK EXPERIENCE

MB Philippines Inc.

August 14, 2024 – Present

Junior Programmer

- Provided application and technical support for core banking systems, including local and overseas rural banks (Poephei State), handling data correction, validation, deployment, and issue resolution
- Conducted on-site and remote IT support for client banks, assisting with system setup, troubleshooting, and user support
- Developed and enhanced core banking system features using Grails, Groovy, and PostgreSQL
- Performed manual QA and API testing for system integrations and core banking functionalities
- Designed and improved UI/UX for core banking interfaces
- Built a URL/IP whitelisting dashboard for rural banks
- Generated regulatory reports (FRP Link, COCREE2.0) and coordinated with partner banks for BSP compliance
- Created and maintained technical documentation, and designed reports using JasperReports Studio
- Deployed applications using GlassFish and monitored logs for troubleshooting and performance
- Managed and maintained the company website, including migration to modern technologies and integration of Google reCAPTCHA
- Monitored and managed Huawei Cloud and Google Cloud services to ensure system performance and uptime

EDUCATION

Bachelor of Science Information Technology | 2020 – 2024

STI College Pasay-Edsa (Cum Laude)
College

PROJECTS

MBPhil Website (mbphil.com)

- Redesigned and improved the website for better user experience and performance. Developed using Next.js, TypeScript, and Bun. Implemented Google reCAPTCHA to prevent bot submissions and integrated Resend for secure email handling. Applied basic SEO optimization including metadata structuring and performance improvements.

Mesenieng Website (mesenieng.com)

- Developed a user-friendly website using Next.js, TypeScript, and Bun, with Resend for email services. Configured WordPress (Bluehost) as a headless CMS for easier content management, and set up DNS forwarding to Vercel for deployment. Implemented SEO best practices such as metadata optimization, structured content, and improved page performance.
